Type of Presentation and Time:

Feel free to check more than one if you are flexible in what kind of session you want to host. Each presentation session is 1.5 hours total.

- Roundtable** – This format allow for multiple presenters to provide a discussion-based session simultaneously where presenters will facilitate dialogue on certain topics or issues with the table participants. If you choose this option, you will present the same information in a 20 minute time frame to three different audiences during the 90 minute agenda time slot. The audience will switch tables at 20 minute intervals to join a different discussion topic. This option will not allow for overhead or AV presentation style, and will be dependent on enough presenters to support this format.
- Breakout Session Presentation** – Provide a 20-30 minute presentation in succession with 2-3 other presenters. This will be an informational sharing presentation and may or may not have a similar theme to the other presenters.
- Panel Presentation** - In collaboration with 2-3 other panelists, each panelist will give a brief description of their work and organization, providing different perspectives on a similar topic and/or project, and answering questions from the audience or facilitator. Depending on the number of panelists, each one would present for 10-15 minutes and leave time for questions and discussion. This is a more interactive format with the panel and audience.
- Workshop** - single, longer, in-depth sessions by one or more presenters as a group that is interactive. They usually provide skill building. (If this option is selected, please fill out additional workshop questions at the end of the Presentation Details section).
  - o Full 90 minutes \_\_\_\_\_.
  - o Split 45 minutes \_\_\_\_\_.
